

SEVEN TIMES STRONGER THAN ORDINARY FELT.

INDISPENSABLE as the First or Foundation Layer for Gravel Roofs.

"Cyclone" Brand

Put up 500 and 1000 Square Feet to each Roll.

Price per Roll, 500 Square Feet. - - - \$1.00

" " 1000 " " " \$2.00

Rolls are 36 Inches Wide.

BEST SLATERS' FELT IN THE WORLD.

CHAPMAN & SODEN,

Manufacturers of ROOFING MATERIALS AND BUILDING PAPERS,

116 Water Street, Boston, Mass.

TEAR THIS END TO TEST STRENGTH.

ARCHITECTS will please note:—

❖ ❖ That as an infallible safeguard against ordinary leakage and percolation of tar, through gravel and composition roofs, it is necessary to specify CYCLONE FELT for the first or foundation layer, owing to its remarkable strength and unequalled **waterproof** properties.

Boston Mass Oct. 2. 1892

I am laying the foundation
of one of the most gigantic
reforms ever undertaken by any
one person. My book would
have more I to make known
my plans. I am saving scraps
of knowledge by the seaside gannet.

This with samples sent is
one of the ideas of reform. A good
roof helps make a person healthy
and happy.

Observer.

CHAPMAN & SODEN,
MANUFACTURERS OF
ROOFING MATERIALS
AND BUILDING PAPERS,
116 Water Street.

Boston, September, 1892.

Dear Sir:

We would ask your inspection of enclosed sample "Cyclone" Felt.

"Cyclone" Felt meets and overcomes all possible objections in the matter of price, strength, durability, cleanliness and waterproof qualities. It is UNIQUE in every particular, and as a foundation or first layer under gravel and composition roofs it is INDISPENSABLE as a safeguard against leakage or percolation of tar. By actual test it is $7\frac{1}{2}$ times stronger than any of the ordinary felts on the market. It makes the finest Slaters' Felt in the world and Architects will serve their clients by specifying "Cyclone" Sheathing, not only as a roof lining but for sheathing the sides of buildings as well.

Yours respectfully,

CHAPMAN & SODEN.

48 Congres

Mr. J. F. Hill
